

FEATURE

- Manufactured from Z-CORE® 470 epoxy resin reinforced with carbon graphite fibers
- Outstanding corrosion resistance to solvents and many chemicals

SIZE RANGE

- 1" to 6"

TYPICAL SERVICES

- 90% Sulfuric Acid
- Methylene Chloride

- Acetone
- Chloroform
- Sodium Hydroxide
- Ethyl Acetate
- Fluorobenzene
- Acetic Anhydride

WORKING PRESSURE

- Max. 275 PSI

TEMPERATURE RANGE

- -50°F to 275°F (- 10°C to 135°C)

*Valve size and service may lower temperature & pressure ratings
